

Excess Stock & Spare Capacity Audit Platform

1. Purpose of the Platform

The Excess Stock & Spare Capacity platform is designed to help businesses **identify, measure, and monetise unused resources** within their operations. These resources may include: - Idle staff time - Underutilised equipment - Empty seats, rooms, or space - Excess or slow-moving inventory

The platform enables businesses to complete structured audits that calculate spare capacity and excess stock, then provides **practical, revenue-focused recommendations**.

The goal is clarity, simplicity, and action.

2. Target Users

- Small and medium-sized businesses
 - Multi-location businesses
 - Service-based businesses
 - Product-based businesses
 - Members and non-members of the 247 Global Business Solutions ecosystem
-

3. Audit Types Overview

SHORT FORM AUDIT

The Short Form Audit is a **fast, self-service assessment**.

Purpose: - Provide a high-level snapshot of spare capacity and excess stock - Help businesses quickly understand where value is being lost

Key Characteristics: - Independent, self-completed - No AI or consultant guidance - Limited number of essential questions - Instant results

Best For: - Quick evaluations - Simple business models - First-time users - Businesses that want speed over depth

Positioning: "A quick health check of your unused business capacity."

LONG FORM AUDIT

The Long Form Audit is a **deep, guided business analysis**.

Purpose: - Deliver a detailed understanding of spare capacity and excess stock - Generate tailored, strategic recommendations

Key Characteristics: - Extended question sets - Sector- and niche-specific logic - Optional AI assistant, consultant, or account manager support - Scenario modelling and forecasting

Best For: - Complex operations - Multi-revenue businesses - Seasonal or fluctuating demand - Strategic planning and growth optimisation

Positioning: "A full operational audit designed to unlock hidden revenue."

4. Industry & Structure Framework

Audit Categories (2)

1. **Spare Capacity**
2. **Excess Stock**

Each category follows the same structural logic:

Sector Structure

- 6 Sectors per Category

Group Structure

- 4 Groups per Sector

Business Types

- Multiple business types per Group
-

5. Example Sector Breakdown (Restaurant – Manufacturing Dropdown)

Sector: Hospitality / Food Services

Groups: - Restaurants - Cafés & Coffee Shops - Catering Businesses - Food Manufacturing / Production

Types (Examples): - Fine Dining Restaurant - Casual Dining Restaurant - Fast Food / QSR - Ghost Kitchen - Event Caterer - Meal Prep Manufacturer

Selecting any sector, group, or type dynamically adjusts: - Background visuals - Question logic - Calculation models

6. Dynamic Visual & UI Behaviour

Backdrop Options

For each sector and niche: - Static image - Video background - Animated GIF

Behaviour Rules

- Selecting a sector updates the background automatically
 - Selecting a niche refines the image further
 - Images remain generic and professional (no branding conflicts)
-

7. Dashboard – First Screen

Strapline

"Welcome to Excess Stock and Spare Capacity Questionnaire"

Instructions (Below Strapline)

"This audit helps identify unused capacity and excess inventory within your business. Please answer all questions accurately. Your results and recommendations depend on the quality of your inputs."

8. User Identification & Welcome Message

Welcome Message: "Welcome to your M.Commerce Audit"

Displayed Fields: - Business Owner Name - Directory ID Number - Audit ID

9. Landing Page Design & Content

Core Sections

1. Hero Section

- Animated graphic or GIF
- Headline: "Turn Idle Resources Into Revenue"

2. Interactive Video

Explains: - Difference between Short Form and Long Form audits - Who should use each option - What outcomes to expect

3. Audit Comparison Panel

Clear side-by-side comparison: - Time required - Depth of analysis - Support level - Output quality

4. Why Quarterly Audits Matter

Key reasons: - Identify profit leakage - Adjust for seasonality - Improve cash flow - Optimise staffing and inventory - Support strategic decision-making

5. Access & Payments

- PayPal
- Stripe

Access Rules: - Directory members: token-based access - Non-members: pay-as-you-go

10. Token Logic (High-Level)

- Tokens have monetary value
 - Token value is linked to:
 - 247GBS membership level
 - Directory badge status
 - Higher membership = lower token cost per audit
-

11. Audit Completion Reminder

Mandatory Reminder Message: "Please complete this audit as accurately as possible, as it will impact your final results and recommendations."

12. Step-by-Step Audit Flow

Step 1: Spare Capacity Input

Users enter details such as: - Idle staff - Empty seats - Unused equipment

UI Features: - Up/down arrows for easy adjustment - Real-time calculations

System Action: - Calculates total spare capacity percentage

Step 2: Excess Stock Input

Users enter: - Quantity of excess stock - Storage utilisation - Waste levels

UI Features: - Adjustable numeric inputs - Instant feedback

System Action: - Calculates excess stock value and impact

Step 3: Recommended Solution

Based on combined results: - Spare capacity percentage - Excess stock levels

System Output: - Capacity improvement suggestion - Example: increase utilisation by 5% - Auto-calculated projected value increase

13. Mandatory Restaurant Calculation Questions

- Number of outlets
 - Seats unoccupied during peak hours
 - % of kitchen equipment idle
 - Number of underutilised staff per shift
 - % unused catering/event capacity
 - Hours dining space sits empty per day
 - % of unused storage space
 - Number of underutilised delivery vehicles
 - % reservation no-shows per month
 - Tables set but unused daily
 - % of prep work outsourced vs in-house
-

14. Additional Restaurant Diagnostic Questions

- Percentage of premium ingredients wasted
 - Frequency of over-ordering specialty items
 - Plate waste tracking practices
 - Portion size vs disposal analysis
 - Duplicate or unused kitchen tools
 - Excess promotional packaging stock
 - Emergency plans for expiring ingredients
 - Subscription sourcing models
 - Stockpiling due to supply chain disruption
 - Local resale or redistribution options
-

15. Outcome & Value Proposition

At completion, businesses receive: - Clear capacity utilisation score - Excess stock impact summary - Revenue recovery opportunities - Actionable recommendations

The platform turns **visibility into profitability** and **data into decisions**.

16. Summary

This system is not a survey. It is a **business optimisation engine** designed to: - Reduce waste - Increase utilisation - Improve margins - Support long-term growth

Built for clarity, designed for action, and structured for scale.
